DOB: 09.05.2024

Name of the procedure: Male Circumcision

Statement of the health professional:

I have explained the procedure to the parents in detail. I have explained the risks of the procedure such as **pain, bleeding, infection, meatal scabbing (inflammation of the opening of the penis) or stenosis (narrowing), removal of too much or too little skin, urethral injury, injury (amputation) of the glans and inclusion cyst. Very rarely a revision is required.**

Occasionally Circumplast/ may not extrude out spontaneously and may require removal. In case of bleeding the child may require emergency operation and / or hospitalisation and blood transfusion. There is also a very small risk of **hypersensitivity reaction to local anaesthetics.**

Verbal and written information has been given to the parents. They have also watched an informative video. I have explained restraining during procedure and discussed sharing of information with other healthcare providers.
