Telephone Number	01792650716

**Referral Update Details**

With reference to your referral to Urology dated 27/02/2023, and a review by Paul Jones, your referral has been returned and an appointment has not been booked for this patient. Comments, if any, provided at the time of the review are included below and may provide further information as to the reasons for this referral being returned: Thanks, I reviewed this young man myself a month ago in the paediatric urology clinic and found no genital concern and I agree with your opinion. Penile torsion is a very (incorrectly) over diagnosed condition and if Dad wishes to have a circumcision undertaken on his son for non medical reasons then he is best directed to another experienced practitioner.
